WORK EXPERIENCE

Zillow <i>Software Development Engineer II, Applied Science (AI)</i>	Remote - Mexico <i>July 2025 - Present</i>
• Led MLOps initiatives involving the deployment of data pipelines, machine learning models, and Jupyter notebooks on Databricks. • Built and maintained custom integrations with OpenAI APIs, including LangChain-powered clients tailored for internal use cases. • Participated in on-call internal programs to assure service reliability in key products and raise high priority alerts. • Helped Applied Scientists & Machine Learning Engineers by applying A/B tests and feature flags for experiments in production services. • Reduced technical debt of many projects by updating them to the newest stable version of Python, Spark & Databricks.	
Samsara <i>Solutions Integration Engineer II, Integrations</i>	Remote - Mexico <i>September 2023 - July 2025</i>
• Development of internal command-line tools in Golang. • Architecture of solutions based on cloud platforms (AWS, Azure, GCP). • Development of third-party systems integrations with Python making use of event-driven and serverless architecture. • Maintenance of CI/CD Pipelines for AWS and GCP-based solutions.	
EnvíoClick <i>Backend Developer, Product Engineering</i>	Remote - Mexico <i>September 2022 - September 2023</i>
• Serverless microservices development in Python (AWS Lambdas) using SQL(MySQL) and NoSQL(Redis, DynamoDB) databases and other AWS products(IAM, S3, API Gateway, RDS, Cloudwatch). • Development of third-party REST/SOAP/XML-RPC APIs integrations for e-commerce and payment processing platforms (Shopify, Magento, WooCommerce, MercadoLibre). • Design and development of REST APIs in PHP and Python.	
SyncwareMX <i>Fullstack Developer, Consultant (Part Time)</i>	Remote - Mexico <i>June 2022 - November 2022</i>
• Design and development of REST APIs in Go using SQL(MySQL) and NoSQL(Cloudant) databases. • API documentation using the OpenAPI specification(Swagger). • Design and development of UIs with Svelte and TailwindCSS. • Deployment of applications using Docker and IBM Cloud.	
DerasInmobiliaria <i>Founding Software Engineer, Core Platform</i>	Remote - Mexico <i>August 2020 - August 2022</i>
• Development of data analysis modules using Python(Flask, SQLAlchemy) and SQL Databases. • Configuration and management of Linux servers (Nginx, Docker). • Design and development of Microservices in Golang. • Development of real-time notification modules using real-time solutions(Apache Kafka, RabbitMQ, Socket.io).	
Freelance (Self Employed) <i>Software Engineer, Consultant</i>	Mazatlán, Mexico <i>January 2019 - March 2020</i>
• Development of administrative systems in Python, MySQL, Django/Flask. • Development of new modules for existing systems in Java(Spring, Spring Boot, Spark) or PHP(Symphony, Laravel). • Data analysis using relational databases (MySQL, PostgreSQL).	

EDUCATION

Universidad Internacional de La Rioja <i>Master's Degree (MSc) in Quantum Computing</i>	Logroño, Spain 2026 - <i>In Progress</i>
Universidad Autónoma de Sinaloa <i>Bachelor's Degree (BE) in Systems Engineering</i>	Mazatlán, Mexico 2018 - 2022
Colegio Nacional de Educación Profesional Técnica <i>Associate's Degree (AS) in Information Technologies</i>	El Rosario, Mexico 2015 - 2018

CERTIFICATIONS

<u>IT Specialist in Python</u> <i>April 2022</i>	Pearson
<u>IT Specialist in Java</u> <i>October 2022</i>	Pearson
<u>Serverless Computing using Cloud Functions</u> <i>April 2023</i>	IBM
<u>AWS Certified Cloud Practitioner</u> <i>March 2024</i>	AWS
<u>DevOps with Docker</u> <i>June 2024</i>	University of Helsinki
<u>Green Software Practitioner</u> <i>February 2025</i>	Green Software Foundation

LANGUAGES

Spanish
Native

English
Professional (C2)

SKILLS

Tech stack: Python, Golang, Javascript, SQL, NoSQL, Kafka, AWS, GCP, Azure, Docker.

Software skills: Jira, Salesforce, Confluence, Zendesk, Slack, GitHub, BitBucket, Postman.

Methodologies: Agile, Kanban.

EXTRAS

- **B1 (Business) American Visa**
